# OPPORTUNITIES FOR STROKE RECOVERY HAVE NEVER BEEN GREATER

UPDATED GUIDELINES EMPHASIZE IMPORTANCE OF QUICK ACTION

About

**795,000**

Americans will have a new or recurrent stroke this year.

More than

**690,000** PER YEAR

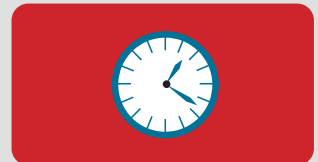

U.S. strokes are caused when a clot cuts off blood flow to a part of the brain (called an ischemic stroke).

Stroke is the No. 4 cause of death in the United States, killing more than 165,000 per year.<sup>1</sup>

**1 in 19 DEATHS**

## QUICK TREATMENT = LESS BRAIN DAMAGE! Importance of Getting to the Hospital Quickly

Get to the hospital at the first sign of stroke so you can be evaluated and receive treatment in time. Stroke treatment begins in the ambulance. Calling 911 can help patients get treated more quickly and get them to a hospital that specializes in stroke care.

AS SOON AS POSSIBLE WITHIN **4.5 HOURS** in select patients

IV alteplase or tenecteplase

AS SOON AS POSSIBLE WITHIN **UP TO 24 HOURS** AFTER STROKE BEGINS<sup>2</sup> in select patients

mechanical thrombectomy

Clot busters and clot-removal procedures must be administered within a few hours of stroke symptoms to lessen the chance of being disabled after a stroke.

Mechanical thrombectomy is a procedure that can physically remove a large blood clot from a blocked artery in the brain.
